

SALOT ARYAN

Entry-Level Cybersecurity Analyst | SOC Analyst | Web Application Security

+91 9313092003 | ariansalot32@gmail.com | linkedin.com/in/salot-aryan | github.com/aryansalot | tryhackme.com/p/aryansalot32 | Ahmedabad, Gujarat

PROFESSIONAL SUMMARY

Cybersecurity student pursuing an M.Sc. (IT) with a Cybersecurity specialization, backed by hands-on training in SOC operations, network security, and web application penetration testing. Practical experience using Burp Suite, Wireshark, Nmap, and Wazuh SIEM to identify and analyze OWASP Top 10 vulnerabilities including SQL Injection, XSS, IDOR, and Broken Authentication. Seeking an entry-level SOC Analyst or Cybersecurity Analyst role to apply security monitoring, vulnerability assessment, and incident response skills in a live environment.

CORE TECHNICAL SKILLS

- Security Tools:** Wazuh SIEM, Burp Suite, Wireshark, Nmap, Zenmap, VeraCrypt, Splunk
- Security Domains:** OWASP Top 10, Vulnerability Assessment, Web Application Security Testing, Log Analysis, Threat Intelligence, SOC Monitoring, Incident Response Fundamentals
- Networking:** TCP/IP, DNS, HTTP/HTTPS, OSI Model, Network Protocols, Network Security Basics
- Operating Systems:** Linux, Windows, Windows Server
- Programming & Scripting:** Python, SQL, Shell Scripting, Java (Basic), PHP (Basic)

EXPERIENCE

Cybersecurity Intern — Sparks To Ideas, Ahmedabad

- Completed a hands-on cybersecurity internship covering networking fundamentals, core security concepts, and web application security testing.
- Used Burp Suite to intercept, inspect, and analyze web traffic for vulnerability discovery in test applications.
- Studied the OWASP Top 10 risks and applied them practically by solving beginner-level labs on PortSwigger Web Security Academy.
- Successfully identified and exploited vulnerabilities across 5 categories: SQL Injection (SQLi), Cross-Site Scripting (XSS), IDOR, Broken Authentication, and Access Control, strengthening practical web security testing skills.

L1 Cybersecurity Analyst Training — IONX (Institute of Network Experts), Ahmedabad

January 2026

- Completed structured SOC Analyst (L1) training covering cybersecurity defense fundamentals, network security basics, and ethical hacking awareness.
- Trained on core SOC workflows including security monitoring, threat identification, log review, and escalation procedures used by security operations teams.
- Built foundational understanding of threat intelligence concepts and how SOC analysts triage and respond to security alerts.

PROJECTS

Hands-on Security Practice — TryHackMe — tryhackme.com/p/aryansalot32

- Actively practicing offensive and defensive security fundamentals through TryHackMe rooms, including network scanning, web exploitation, and Linux/Windows security concepts.

Temple Management System — Personal Project — github.com/aryansalot

Python, Django, HTML, CSS, JavaScript, SQL

- Built a full-stack temple management web application in Python/Django, implementing pooja and darshan booking, festival information, and an interactive holy-places map.
- Designed a responsive front end (HTML, CSS, JavaScript) and a SQL-backed e-commerce module for spiritual products, handling data storage, retrieval, and transaction flow.
- Integrated location data for major pilgrimage sites (Badrinath, Jagannath Puri, Rameshwaram, Dwarka) and a contact module, ensuring reliable end-to-end system performance.

EDUCATION

M.Sc. (IT) – Cybersecurity — JG University, Ahmedabad

2025 – 2027

Bachelor of Computer Applications (BCA) — CGPA: 6.63 — Adarsh BCA College, Botad

2022 – 2025

CERTIFICATIONS

- SOC L1 (Security Operations Center) Training — IONX, Ahmedabad (Jan 2026)
- Ethical Hacking Course — TuteDude
- Cybersecurity Internship Certificate — Sparks To Ideas, Ahmedabad
